Less than 3% of the roughly 250.000 kinds of crops grown for human social use. In a top-down system of agricultural research, farmers only look to become the recipient rather than a participant. since this system has resulted in the situation in a relatively small amount of plant varieties. This trend and the increasing industrialization of agriculture is the main factor of the genetic erosion. For the protection of diversity, improved crop and agricultural research and development to the production of high-quality food for all, need to take a whole new way. This book explores what such a way that one: participatory plant breeding. By depicting the Canadian...
