

Bulletin of the American Mathematical Society Volume 15

By American Mathematical Society

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1909 Excerpt: . and yet obtain information as to the extent of the interval in which a weak minimum exists. In the present note Dr. Underhill applies these methods to several of the standard problems. 16. Mr. Schweitzer defines the vectors $X = x_1E_1 + x_2E_2 + x_3E_3 + x_4E_4$, $z, X = XE, + p.zE_2 + vE, + -JBV jsX = XEX + n E_2 + v E, + a/\#, Kx = KEX + - + v E_3 + - XEV Pv Pit P$ being constants. The operators $itl, j, K, ./- k; i., i., k.$ constitute (with unity) three systems of hamiltonian units. The systems have the same sense if $e_2 = e, = e_2$ and all the systems are right-handed if $e_2 = e = e_2 = -1$. Thus the function $p(x + x+x + xf$ may be said to be characteristic of the quaternion as an...
