This manual, *Generating Force Support for Operations*, defines the Army's generating force and establishes as doctrine the employment of its capabilities in support of ongoing joint and multinational operations and deployed forces. It describes how operating forces can access and employ generating force capabilities in support of ongoing operations. It incorporates lessons learned from recent and ongoing operations, including Operations Enduring Freedom and Iraqi Freedom, the War on Terrorism, the response to Hurricane Katrina, and others. This information allows operational Army forces to understand generating force capabilities and employ these capabilities successfully in support of ongoing operations. It enables generating force organizations to ready these capabilities. This manual describes how the joint force can access and employ generating force capabilities in support of operations. The generating force consists of Army organizations whose primary mission is to generate and sustain the operational Army. The United States Army Training and Doctrine Command (TRADOC), for example, is part of the generating force. Activities the generating force conducts in support of readiness, Army force generation (ARFORGEN), and the routine performance of functions specified and implied in Title 10 and other applicable legislation are addressed in Army regulations and Department of the Army pamphlets and are not addressed here. As a consequence of its performance of functions specified and implied by law, the generating force also possesses operationally useful capabilities for employment by or in direct support of joint force commanders. This manual's introduction elaborates the manual's purpose and explains the necessity of employing generating force capabilities in the conduct of operations. It introduces the three principal categories of generating force support to ongoing operations: adapting to the operational environment, enabling strategic reach,...
